INTRODUCTION

In response to a resolution of the Joint Legislative Audit Committee and in compliance with federal Office of Revenue Sharing regulations, we have conducted a financial audit of the Genetic Disease Testing Fund. This audit was conducted under the authority vested in the Auditor General by Sections 10527 and 10528 of the Government Code.

The Genetic Disease Testing Fund was created by Chapter 1112 of the Statutes of 1975 to be a depository for fees charged for testing children born in California for preventable heritable disorders leading to mental retardation or physical defects.

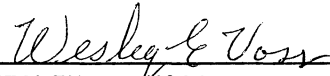

Chapter 1037 of the Statutes of 1977 allows the Director of the Department of Health Services to set a fee at a level sufficient to cover the actual testing and other program costs. Further, this chapter allows for loans from the General Fund to the Genetic Disease Testing Fund to finance the program until the genetic disease testing begins. The loans are to be repaid no later than June 30, 1982.

AUDITOR'S OPINION

To the Joint Legislative Audit Committee of the California Legislature:

We have examined the balance sheet of the Genetic Disease Testing Fund as of June 30, 1979, and the related statements of revenues, expenditures, and changes in fund balance for the year then ended. Our examination was made in accordance with generally accepted auditing standards and accordingly included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

In our opinion, the aforementioned financial statements present fairly the financial position of the Genetic Disease Testing Fund at June 30, 1979, and the results of operations and changes in fund balance for the year then ended, in conformity with generally accepted accounting principles applied on a basis consistent with that of the preceding year.

WESLEY E. WOSS

this statement.

STATE OF CALIFORNIA
GENETIC DISEASE TESTING FUND
NOTES TO THE FINANCIAL STATEMENTS
JUNE 30, 1979

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accompanying financial statements reflect the financial position and results of operations of the Genetic Disease Testing Fund. The statements have been prepared in conformity with generally accepted accounting principles applicable to state and local governments as prescribed by the American Institute of Certified Public Accountants and by the National Council on Governmental Accounting.

The accompanying financial statements are structured into a Governmental Fund Type. Governmental Fund Types are those through which most governmental functions are financed. The acquisition, use, and balances of the government's expendable financial resources and the related current liabilities--except those accounted for in Proprietary Funds--are accounted for through governmental funds. Special Revenue Funds are a Governmental Fund Type.

The Genetic Disease Testing Fund is a Special Revenue Fund established for collecting fees and disbursing monies to support a program for testing children born in California as established by Section 309 of the Health and Safety Code. The tests are designed to detect preventable, heritable disorders leading to mental retardation or physical defects. The Genetic Disease Testing Fund is maintained on a modified accrual basis of accounting. These are some of the significant elements:

Income

Throughout the fiscal year income including revenues, transfers, and reimbursements, except for certain reimbursements which are recorded when billed, are accounted for on a cash basis. At June 30, these accounts are adjusted to accrue earned but uncollected income.

Expenditures

Expenditures are accounted for at the time claims for payments are filed with the State Controller. At June 30, all valid expenditure commitments are accrued as expenditures including encumbrances outstanding against budget appropriations for which no goods or services have been received.

2. DUE TO THE GENERAL FUND

At June 30, 1979, the Genetic Disease Testing Fund owed \$781,762 to the General Fund. The \$781,762 includes:

- \$551,177 for loan advances authorized by Chapter 1037 of the Statutes of 1977. The loan advances fund program expenditures until the program is operational and until fees are collected from participants in the program;
- \$230,585 for goods and services initially paid by the General Fund. During fiscal year 1979-80, the Genetic Disease Testing Fund borrowed an additional \$369,196 both to pay off all outstanding obligations for 1978-79 and to provide additional working capital for 1979-80 obligations.

3. REVENUES

Participants in the program will not be charged a fee for the genetic tests until December 1980 when the program should become fully operational. The fee will be sufficient to fund ongoing operations as well as to provide for repayment of all General Fund loans by June 30, 1982.
